Welcome to Emerald Med Branson

At Emerald Med Branson, we believe in supporting everyday wellness through high-quality, full-spectrum hemp products. Located in the heart of Branson, Missouri, our small team is passionate about offering products we trust — US-grown, carefully extracted, and independently tested.

This guide expands on the topics we share across our social channels. Whether you're new to hemp products, a longtime local, or visiting our beautiful Ozarks community, we hope these insights help you make informed choices that fit your lifestyle.

Our Promise: Full-spectrum extracts, transparent quality practices, and genuine care for our customers and their families (including the four-legged ones).

Important: The FDA does not allow us to make medical claims. We encourage everyone to do their own research and consult healthcare professionals as needed. Our focus is on quality products and education.

1. Why Amber Bottles? Protecting Quality from Light

If you've purchased our tinctures, you've likely noticed the beautiful amber glass bottles. This isn't just for looks — it's a deliberate choice to help protect the integrity of our full-spectrum hemp extracts.

The Science Behind the Color

Amber glass contains compounds that effectively block a significant portion of harmful ultraviolet (UV) and blue light wavelengths. Light exposure, especially UV, can accelerate the degradation of cannabinoids, terpenes, and other beneficial plant compounds over time. By using amber bottles, we help preserve freshness, aroma, and overall quality from the moment of bottling until you use the last drop.

Practical Tips

- Store your bottle in a cool, dark place away from direct sunlight or bright artificial lights.
- Keep the dropper clean and the cap tightly sealed after each use.
- Avoid leaving bottles in hot cars or near heat sources.

These small habits, combined with our protective packaging, help ensure you get the most from every bottle. Quality from seed to bottle — that's the Emerald Med way.

2. Targeted Comfort: High Strength Balm for Sore Muscles & Lower Back

Many customers, including locals dealing with daily life in Branson, use our High Strength Balm for sore muscles and lower back spasms. “I use it on my sore muscles and lower back whenever those spasms hit” is a common comment we hear.

Why Customers Love the Balm

The balm is formulated for direct, targeted application. Apply it to lower back, shoulders, or any area with muscle soreness or tension. Full-spectrum hemp extract helps provide localized comfort as part of your daily routine.

Popular Uses

- Sore muscles after activity or long days
- Lower back tension and occasional spasms
- Shoulders, knees, or hands needing extra support

Fast-absorbing and easy to use. Pairs wonderfully with our Sleep Gummies for evening routines.

3. Supporting Golden Years & Active Seniors

Many members of our Branson community are enjoying their retirement years and staying active. We hear from folks who appreciate gentle, easy-to-use options as part of their daily routines. Our products are designed with simplicity and quality in mind.

What Many Appreciate

- Easy sublingual tinctures that fit into morning or evening routines
- Targeted balm for knees, hands, and feet
- Clear labeling and straightforward usage guidance
- Local, approachable service — we're happy to answer questions in person

As with any wellness product, we always recommend starting with a lower amount and consulting with a healthcare provider, especially if you're taking other medications or have specific health considerations.

We're proud to serve the senior community in Branson and the surrounding areas with the same care we'd want for our own families.

4. Simple Daily Rituals with Our Tinctures

Our full-spectrum tinctures are designed for easy, consistent use. Many customers find a simple routine works best.

Suggested Approach

- Start with a small amount (we recommend beginning low and going slow)
- Place under the tongue and hold for about 2 minutes before swallowing
- Many people incorporate it into their morning or evening routine
- Stay consistent for a period of time to assess how it fits your lifestyle

Both our 0% THC and 0.3% THC options are popular. The 0% THC version is often chosen by those who prefer to avoid any THC or who undergo regular testing.

5. Sleep Gummies for Restful Nights & Refreshed Mornings

Many of our customers tell us our specially formulated Sleep Gummies help them 'sleep like a baby' and wake up feeling more comfortable. These gummies are designed to support relaxation and

deeper rest as part of your nightly wellness routine.

How Customers Use Sleep Gummies

- Take in the evening as part of winding down
- Support for everyday nerve tension and inflammation response
- Help promote a more restful night and easier mornings

Formulated with full-spectrum hemp extract. Available in delicious flavors and easy-to-dose format — perfect for those who prefer gummies over tinctures.

6. Understanding Full-Spectrum Hemp Extracts

We focus exclusively on full-spectrum extracts because we believe in the potential of the whole plant working together. Full-spectrum means you get CBD along with other naturally occurring phytocannabinoids (like CBG, CBC), terpenes, flavonoids, and beneficial plant compounds.

Many people refer to this synergy as the “entourage effect.” While research is ongoing, this is one reason we choose to offer full-spectrum rather than isolates or very narrow extracts.

Our Options

- **0.3% THC Full-Spectrum** — The federal legal limit, maximizing the entourage effect
- **0% THC** — Processed to remove detectable THC while retaining other beneficial compounds (great for those with testing concerns)

Both are made from US-grown, certified organic, non-GMO hemp using clean supercritical CO2 extraction.

7. Wellness for Branson Adventures & Visitors

Branson is a special place — shows, lakes, hiking, golf, and that famous Ozarks hospitality. Many visitors and locals alike look for ways to support their active routines while enjoying everything our area has to offer.

Our balm is popular for post-adventure recovery routines. Our tinctures fit easily into travel bags for consistent daily use. And our welcoming downtown store at 113 W Main St is a convenient stop for both residents and guests.

Whether you're here for a weekend of entertainment or a lifetime of Ozarks living, we're happy to be part of your wellness journey.

8. Balm or Tincture? Finding What Fits You

Many customers ask which is better. The truth is — they serve different purposes and often work beautifully together.

Tinctures — Best for easy, consistent daily internal support. Simple sublingual use.

Balm — Best for targeted, localized application on specific areas (knees, hands, feet, etc.).

A common approach: Use tincture daily as a foundation and apply balm as needed for targeted comfort. Both are full-spectrum and available in your preferred THC level.

Stop by the store and we can help you explore what might work best for your routine.

9. Our Quality Standards: From Seed to Bottle

Quality isn't a buzzword for us — it's the foundation of everything we do.

What Goes Into Every Product

- US-grown hemp from nutrient-rich soil
- Certified organic and non-GMO
- Supercritical CO2 extraction (clean, solvent-free)
- Independently third-party tested for purity and potency
- No unnecessary additives, sweeteners, or fillers

We believe transparency builds trust. If you ever have questions about a specific batch or our processes, we're happy to discuss them with you in person or by phone.

10. Starting Your CBD Journey — Smart & Simple

If you're new to hemp products, welcome! Here's our straightforward advice:

- **Start low, go slow** — Begin with a smaller amount and give your body time to adjust
- **Be consistent** — Many people find a daily routine works best for noticing how it fits their life
- **Choose quality** — Look for tested, full-spectrum products from reputable sources (like us!)
- **Listen to your body** — Everyone is different. Pay attention to how you feel
- **Ask questions** — We're here to help. Call, text, or visit the store

There's no pressure and no one-size-fits-all approach. We're happy to guide you based on what you're looking for.

11. Storage Tips to Keep Products Fresh

Proper storage helps maintain the quality of your hemp products over time.

Best Practices

- Keep in a cool, dark location (amber bottles already provide excellent protection)
- Avoid extreme temperatures (hot cars, direct sun, near heaters)
- Keep the dropper clean and the bottle tightly capped
- Store out of reach of children and pets

With good care, your products should stay fresh for an extended period. When in doubt, give us a call.

12. Everyday Comfort for the Whole Family

From supporting active adults and seniors to helping our furry companions feel their best, Emerald Med is here for the whole family. We offer products for humans and pets because we know wellness often involves everyone under one roof.

Our downtown Branson location makes it easy to stop in, ask questions, and find what fits your household's needs. Whether you're stocking up for yourself, your parents, or your pets — we're glad you're here.
